2. Navigation & chrome

/_shell · 2 screenshots

PURPOSE

Global app chrome: expandable sidebar navigation and account menu available on every authenticated page.

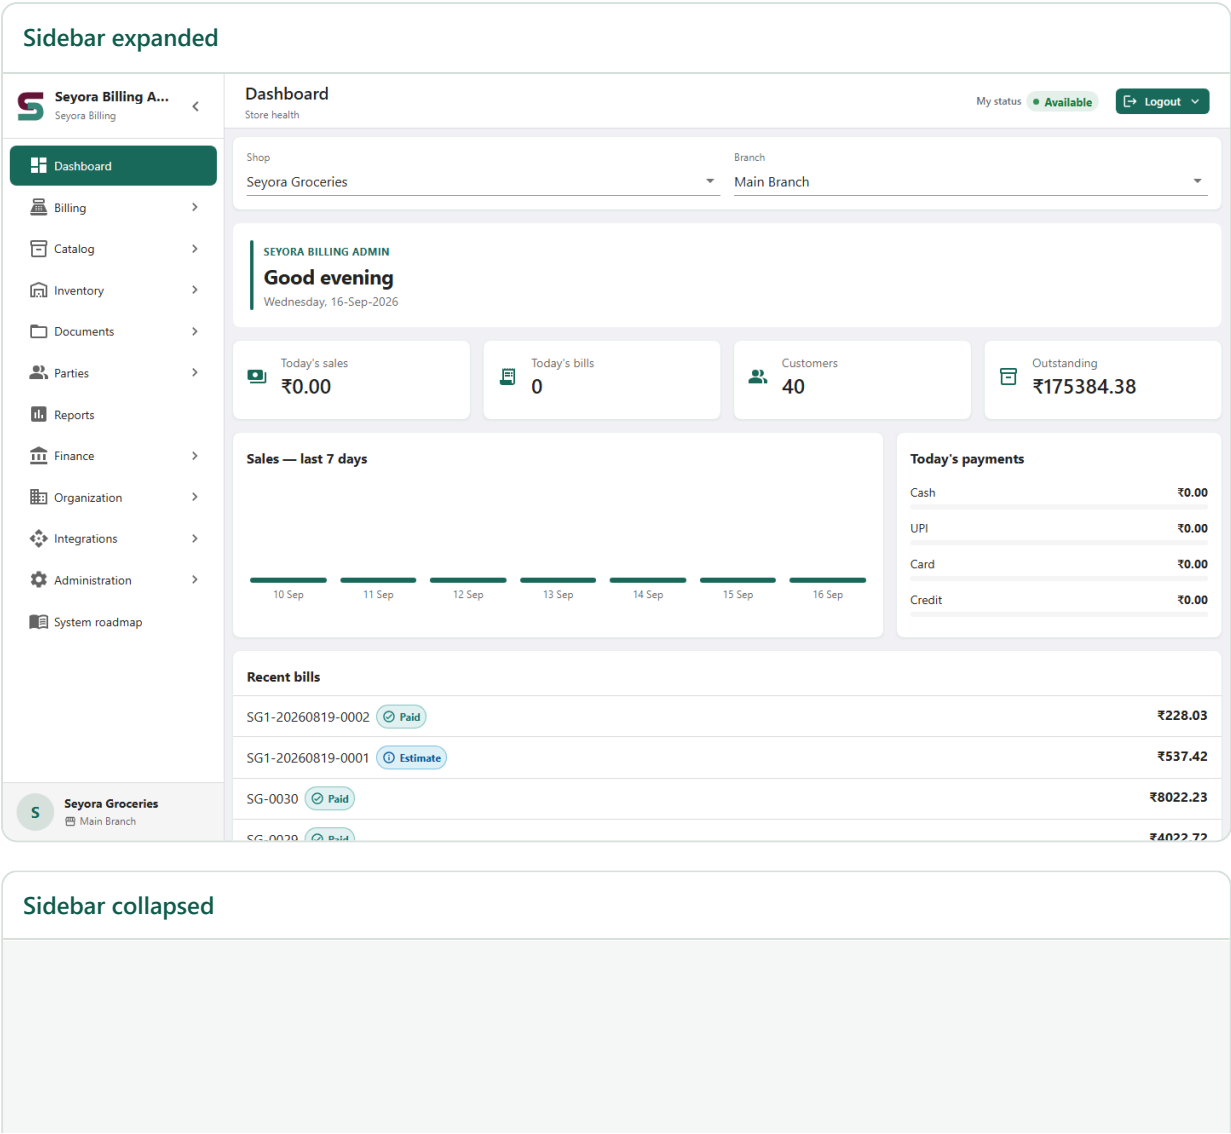

USER FLOW

- 1. After login, the left sidebar lists modules by role and plan.
- 2. Collapse the menu to an icon rail; expand again from the header.
- 3. Open the account menu for profile / logout actions.

FEATURES

- Expanded & collapsed sidebar
- Active route highlight
- User menu

SG-0030	Paid	₹8022.23
SG-0030	Paid	₹4022.72

3. Dashboard

/ · 1 screenshot

PURPOSE

Branch-scoped home screen showing today's sales health, payment mix, low-stock warnings, and recent bills.

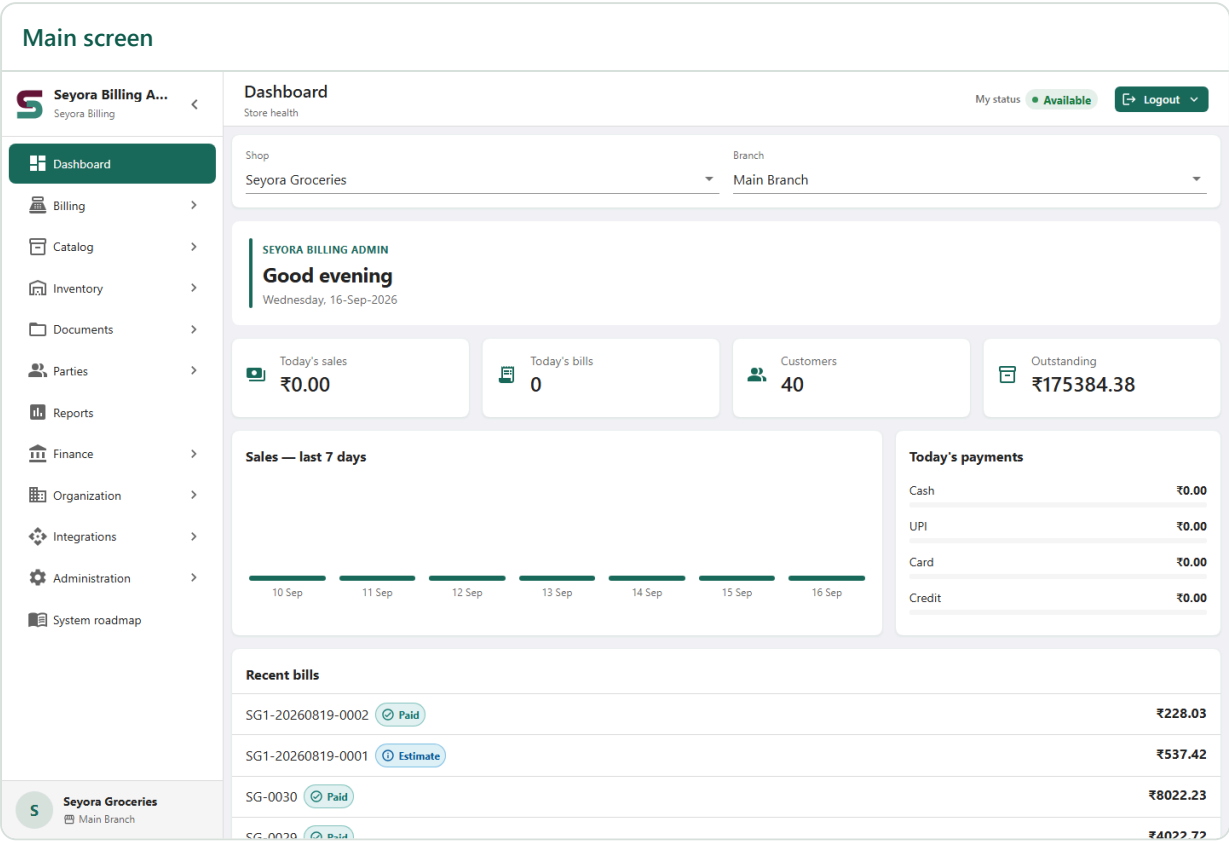

USER FLOW

- 1. Select shop/branch in header
- 2. Page loads KPIs, 7-day sales chart, and today's payment split
- 3. Click low-stock alert to open /stock/low
- 4. Click a recent bill row to open bill detail
- 5. Review chain rollup when multiple branches exist

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

4. New bill

/pos · 1 screenshot

PURPOSE

Primary **counter sale** screen. Cashier scans barcode or searches products, builds a cart, applies discounts/GST, collects payment (cash/UPI/card/credit split), prints receipt, or **holds** / **estimates** the bill. Requires an **open till** (`CashierShift`). Can resume held bills and accept **clinic pharmacy handoff** lines from `/pharmacy/inbox`.

USER FLOW

1. User opens `/pos` — system checks **till open** (`GET /current`).
2. If closed → prompt to open till (`POST /open`) with opening cash.
3. User scans barcode or types product search → `GET /products?q=` (exact barcode match auto-adds).
4. Optional: pick **sell unit** (box/pcs) via unit conversions; pick **medicine batch** if module enabled.
5. Lines appear in cart — adjust qty, price, line discount, GST%.
6. Select customer (walk-in default) — credit limit checked on pay.
7. **Pay F2** → `PayDrawer` → `POST /bills` then `POST /bills/{id}/finalize` with payments array.
8. Stock deducted via `inventory_service.move` (reason: sale).
9. Print receipt / optional WhatsApp text; cart cleared.
10. **Hold F3** — saves bill with status `held` (local + API); stock not reduced until finalize.
11. **Estimate** — bill status `estimate` (quote-like).
12. **Close till** — `POST /close` with counted cash vs expected.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

5. Bills

/bills · 1 screenshot

PURPOSE

Paginated list of **all sales invoices** for the selected shop/branch. Search by bill number or customer; filter by status kind (All, Paid, Credit, Held, etc.). Open bill detail, or **quick full return** from the row action (undo icon).

USER FLOW

- 1. User opens `/bills` with shop/branch filters.
- 2. Optional: search (`q`) and status filter (`kind`) — debounced → `GET /bills`.
- 3. Table shows bill no, date, customer, status chip, total, due.
- 4. **Eye icon** → navigate `/bills/{bill\_id}` (detail).
- 5. **Return sale icon** (red undo) → immediate `POST /bills/{id}/return` (full return, **no confirm dialog**) → list reloads; status → `returned`.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

Rows per page: 10 1-10 of 32

6. Held bills

/bills/held · 1 screenshot

PURPOSE

Lists **parked counter sales** (status `held`). Cashier can **Resume** into POS with cart restored, or **Delete** (cancel) the held bill. Stock was **never reduced** for held bills.

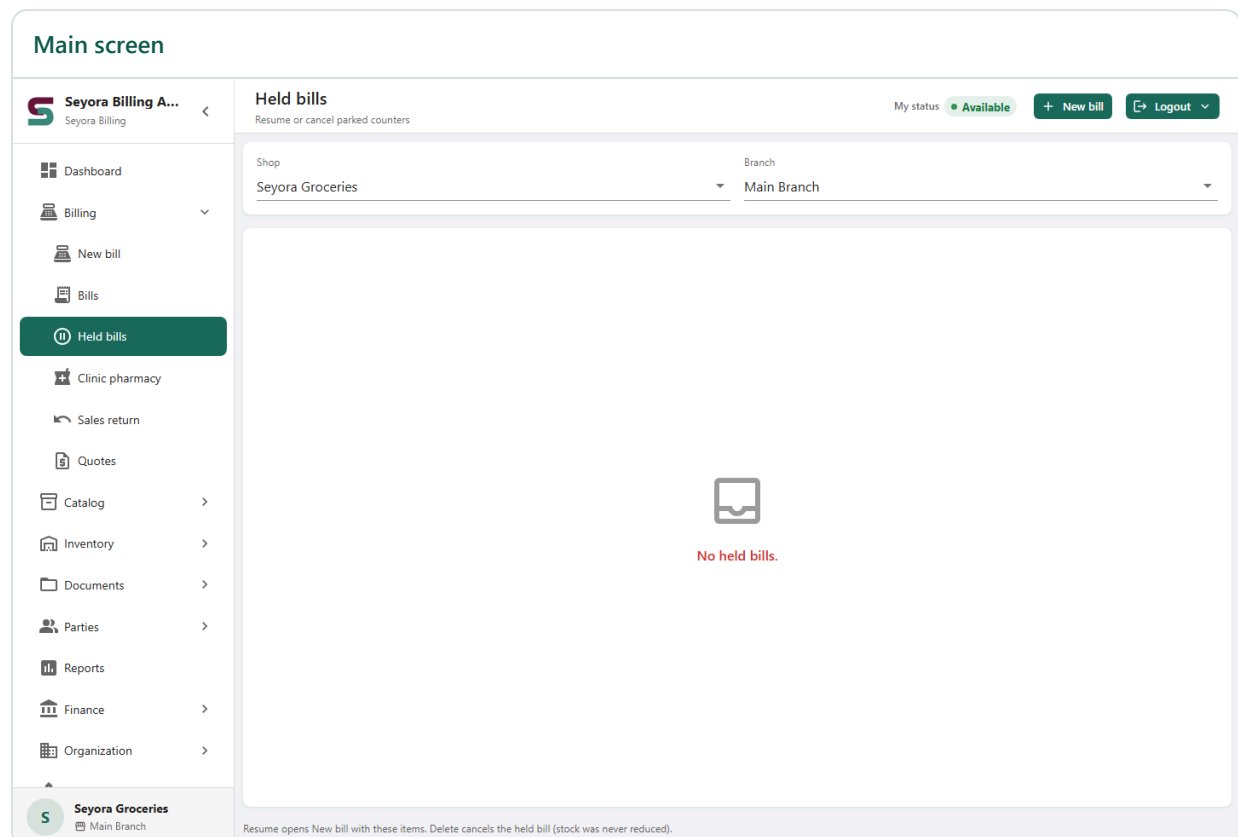

USER FLOW

1. User opens `/bills/held`.
2. `GET /bills?status=held` — paginated list.
3. **Resume** → `/pos?resume={bill\_id}` — POS loads bill lines into cart.
4. **Delete** → ConfirmDialog → `POST /bills/{id}/cancel` — bill cancelled permanently.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

7. Clinic pharmacy inbox

/pharmacy/inbox · 1 screenshot

PURPOSE

Pharmacy staff **review clinic prescriptions** pushed from Healthcare, resolve **FEFO stock** at billing branch, **substitute** lines, **dispense & pay** (creates billing sale + links clinic request), or **return sale** after dispense. Data lives primarily on **Clinic API**; billing cloud **proxies** integration calls.

USER FLOW

1. **Inbox list** (`PharmacyInboxPage``)
2. Open `/pharmacy/inbox`` — requires shop + branch.
3. `GET /integrations/clinic/dispense-requests`` — paginated queue.
4. Status filter; lazy **FEFO badge** (ready/blocked counts) for selected row only.
5. Expand row → embedded `PharmacyRequestDetailPage``.
6. **Quick dispense** (menu) → confirm → `POST .../quick-dispense`` for FEFO-ready lines.
7. **Detail** (embedded or `/pharmacy/inbox/:requestId``)
8. Load request + lines from clinic API.
9. **Verify session** → catalog map (clinic SKU → billing product_id).
10. **FEFO resolve** — `GET .../fefo-summary`` (server-side resolve + optional catalog_map cache).
11. Per line: clinic medicine, billing product, batch/expiry, FEFO badge, status.
12. **Substitute** → dialog → pick billing product (paginated) → `POST .../substitute``.
13. **Dispense & pay** → PayDrawer → `createPharmacyDispenseSale`` → bill + clinic link.
14. After dispense: optional print receipt/labels; **Return sale** · {bill_no} → confirm → `POST .../return``.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

Inbox queue 0 total

Expand a row to review and dispense

No clinic pharmacy requests for this branch.
Requests appear here when Healthcare sends OP invoice pharmacy lines.

8. Sales return

/returns · 1 screenshot

PURPOSE

Lookup **returnable paid sales** (billing bill numbers, not clinic `INV` invoices).
Paginated table (10/page) of paid/partial-return bills; open bill detail to return quantities and restore stock.

USER FLOW

- 1. Open `/returns` — loads automatically for selected shop/branch.
- 2. `GET /bills?kind=paid` — server pagination (default 10 rows).
- 3. Optional: debounced search `q` (bill no or customer name).
- 4. Click row or eye icon → `/bills/{bill\_id}`.
- 5. On detail: **Return selected qty** or **Return all**.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

Rows per page: 10

1-10 of 31

9. Quotes

/quotes · 1 screenshot

PURPOSE

Lists **estimate bills** (`Bill.status = estimate`) — price quotes that are not yet sales. Created from POS **Estimate** action or API. Can be converted to paid sale via finalize flow.

USER FLOW

1. Open `/quotes``.
2. `GET /bills?status=estimate`` (paginated).
3. Search by bill no / customer optional.
4. Open row → bill detail or POS to convert.
5. From POS: **Estimate** saves bill without stock movement or payment.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

10. Products

/products · 4 screenshots

PURPOSE

Master **product list** for the branch: search, filter (category, brand, low stock), CSV export/import, add/edit/deactivate. Products feed POS, stock, purchases, pharmacy FEFO, and reports.

USER FLOW

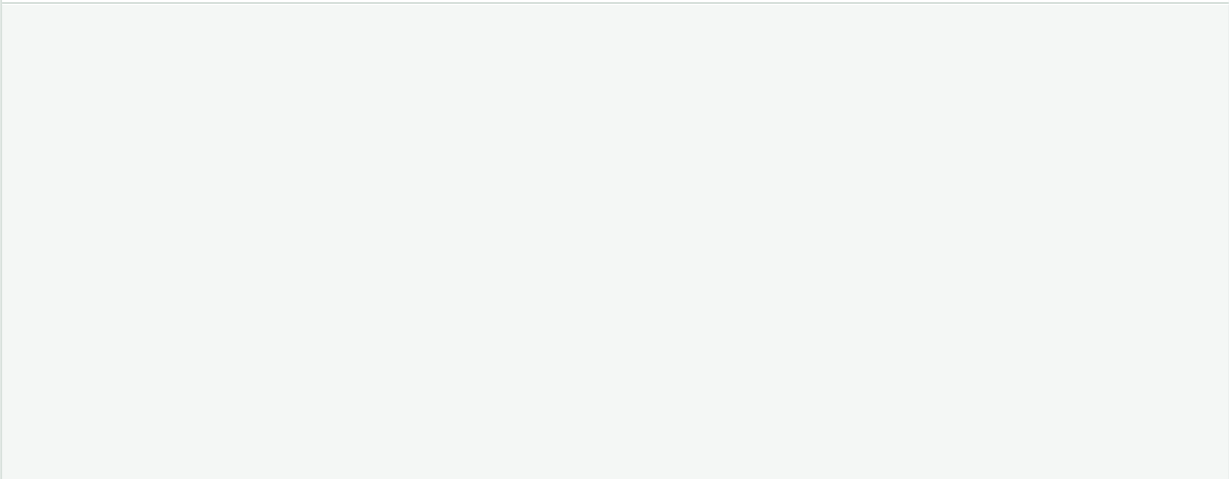

1. ### List (`/products`)
2. Shop + branch scope required.
3. Filters: category, brand, low stock; search `q` (name, SKU, barcode).
4. `GET /products` paginated (10 default).
5. Name column shows **name + #barcode** (merged cell).
6. **Add product** → `/products/new`; **Edit** → `/products/{id}/edit`.
7. **Bulk import** → CSV upload → async job → `/documents/jobs/{id}`.
8. **Export CSV** — client-side fetch all pages → download.
9. ### Form (`/products/new`, `/products/:id/edit`)
10. Load product or empty form.
11. Fields: name, SKU, barcode, prices (MRP, selling, wholesale, purchase), HSN, GST, category, brand, reorder, track_stock, etc.
12. `POST /products` or `PATCH /products/{id}`.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

13. Price lists

/price-lists · 2 screenshots

PURPOSE

Define **named price lists** with per-product **override selling prices** (e.g. wholesale tier, hospital rate). Select list on detail panel; add/remove products with custom prices.

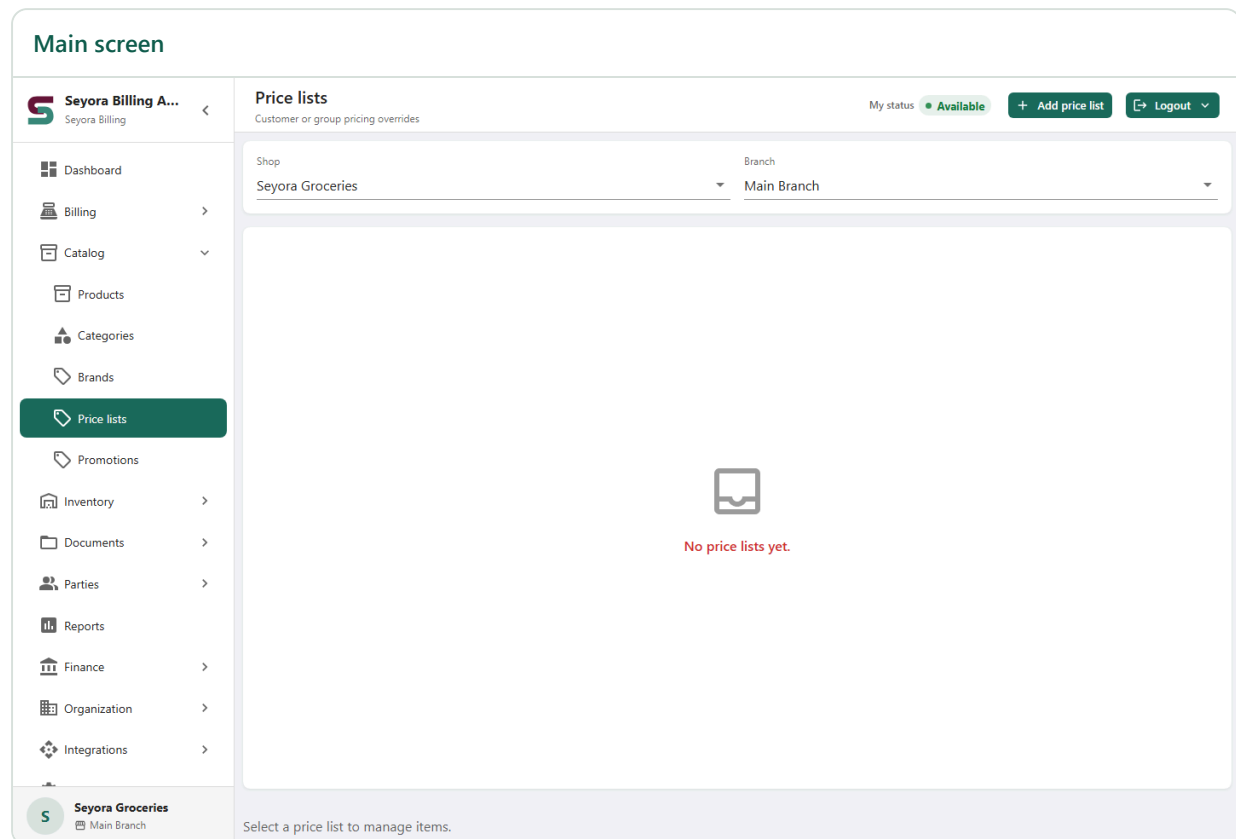

USER FLOW

1. `/price-lists` — list price lists (`GET /price-lists`).
2. Select a list → load items (`GET /price-lists/{id}/items`).
3. **Add list** drawer → `POST /price-lists`.
4. **Add item** — product picker + price → `POST .../items`.
5. Active flag on list (`is\_active`).

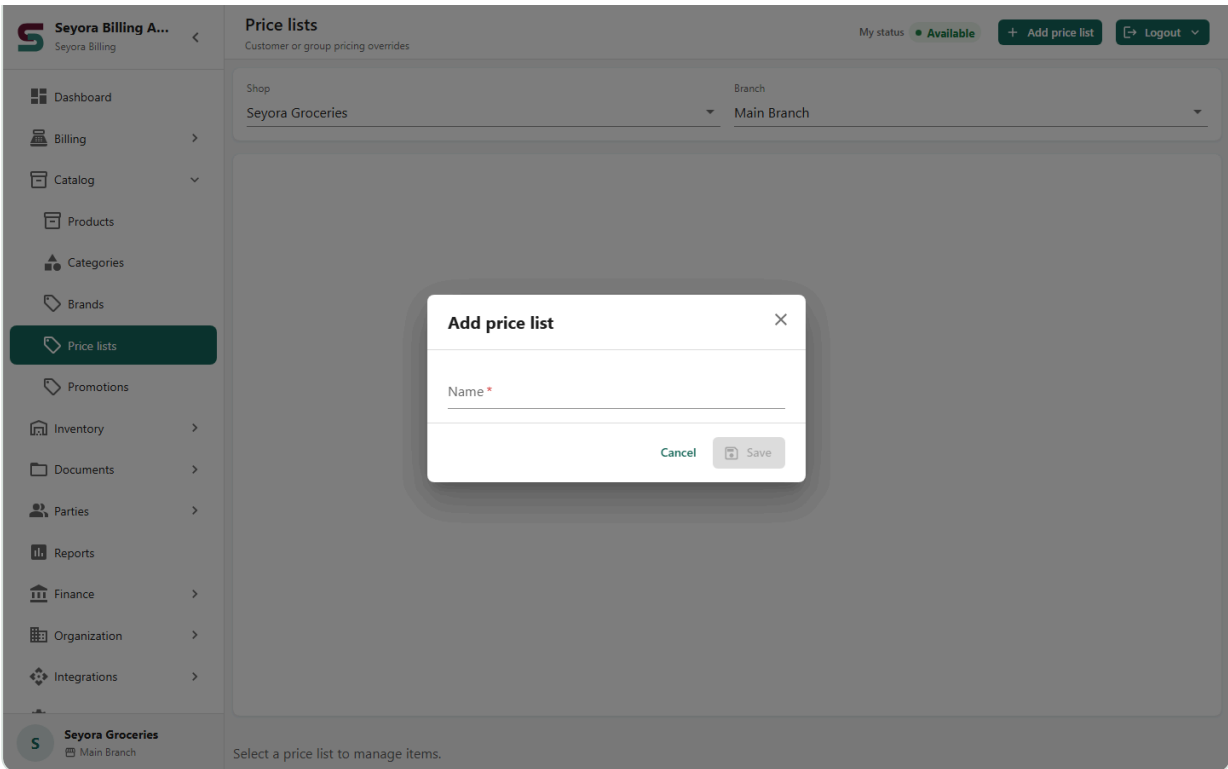

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

Add / Create dialog

14. Promotions

/promotions · 2 screenshots

PURPOSE

Manage ****promotion codes**** (discount rules) applied at POS checkout. List and create promotions with code, discount type/value, validity window.

USER FLOW

- 1. `/promotions`` — paginated list.
- 2. ***Add promotion**** drawer → ``POST /promotions`` with code, name, discount_pct or amount, dates.
- 3. Cashier enters code at POS (if wired) to apply discount.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

16. Medicine batches

/medicine/batches · 1 screenshot

PURPOSE

Pharmacy module for batch-level stock with expiry and MRP tracking per branch.

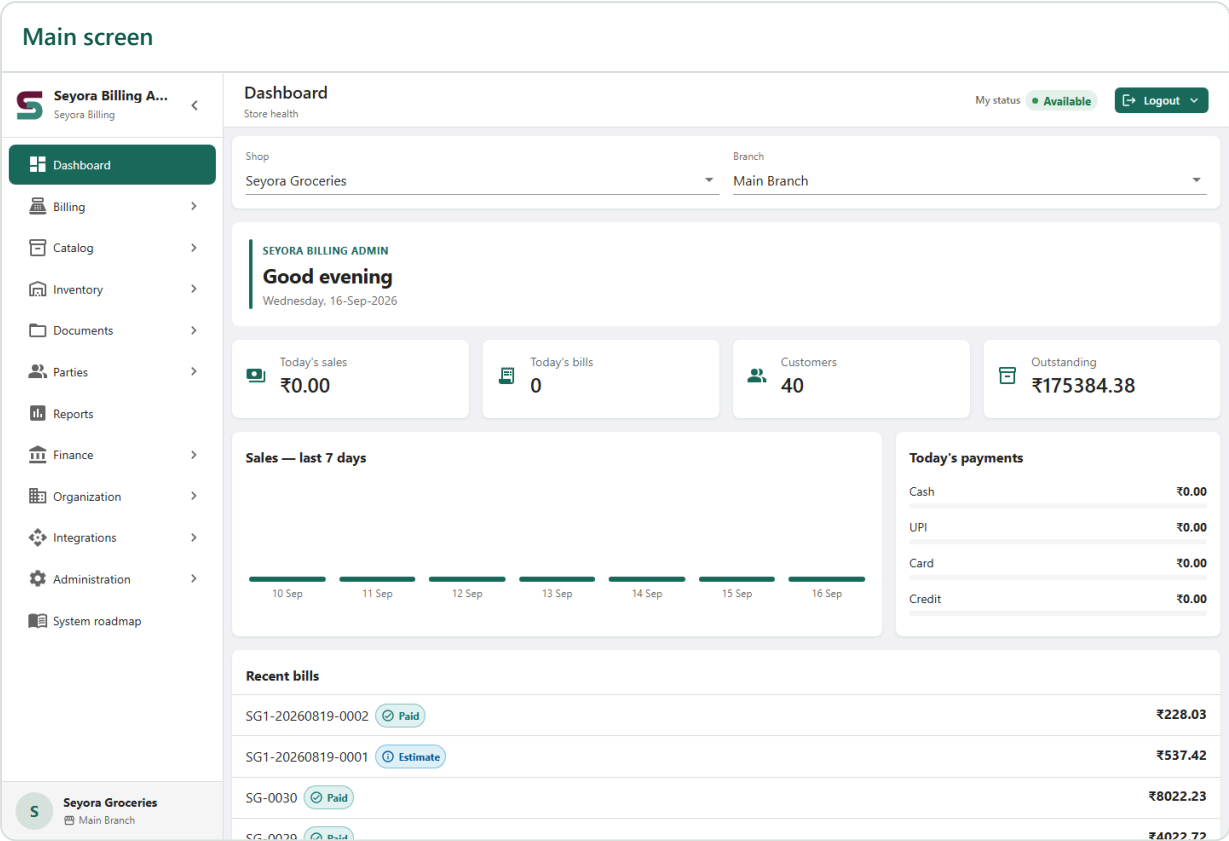

USER FLOW

- 1. Filter batches by status (expired, expiring, in stock)
- 2. Add batch with product, batch no, expiry, qty, MRP
- 3. Edit or delete existing batches
- 4. Review status chips on each row

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

17. Milk subscriptions

/milk/subscriptions · 1 screenshot

PURPOSE

Manage recurring delivery routes and batch-bill daily deliveries.

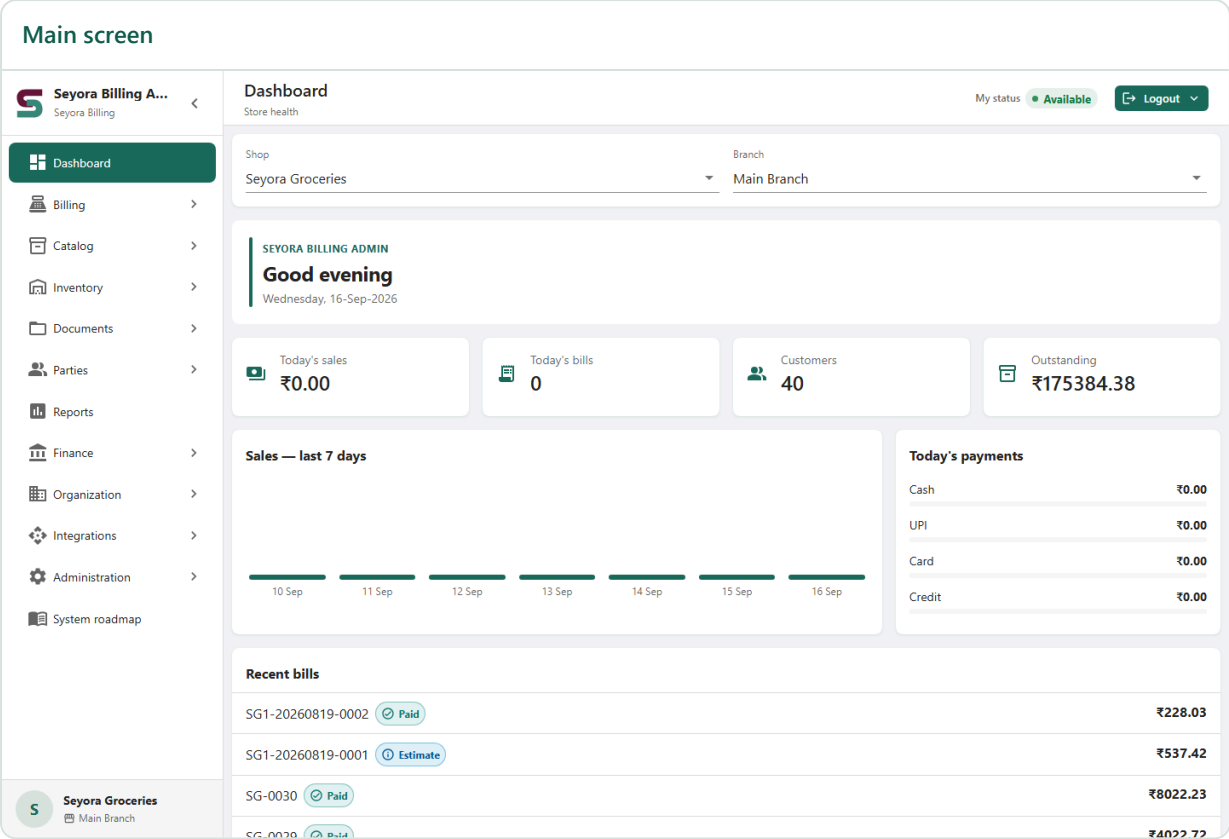

USER FLOW

- 1. View active/paused/stopped subscriptions
- 2. Add subscription: customer, product, qty, slot, start date
- 3. Run today's delivery to auto-create bills
- 4. Edit status or delete subscription

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

18. Purchases

/purchases · 2 screenshots

PURPOSE

List and manage supplier purchase invoices that bring stock into the branch.

USER FLOW

- 1. Search purchase invoices by supplier or invoice no
- 2. Click row to open purchase detail drawer
- 3. Record supplier payment or partial return
- 4. Navigate to /purchases/new for new stock-in

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

32. API keys

/settings/api-keys · 2 screenshots

PURPOSE

Issue scoped API keys for external integrations.

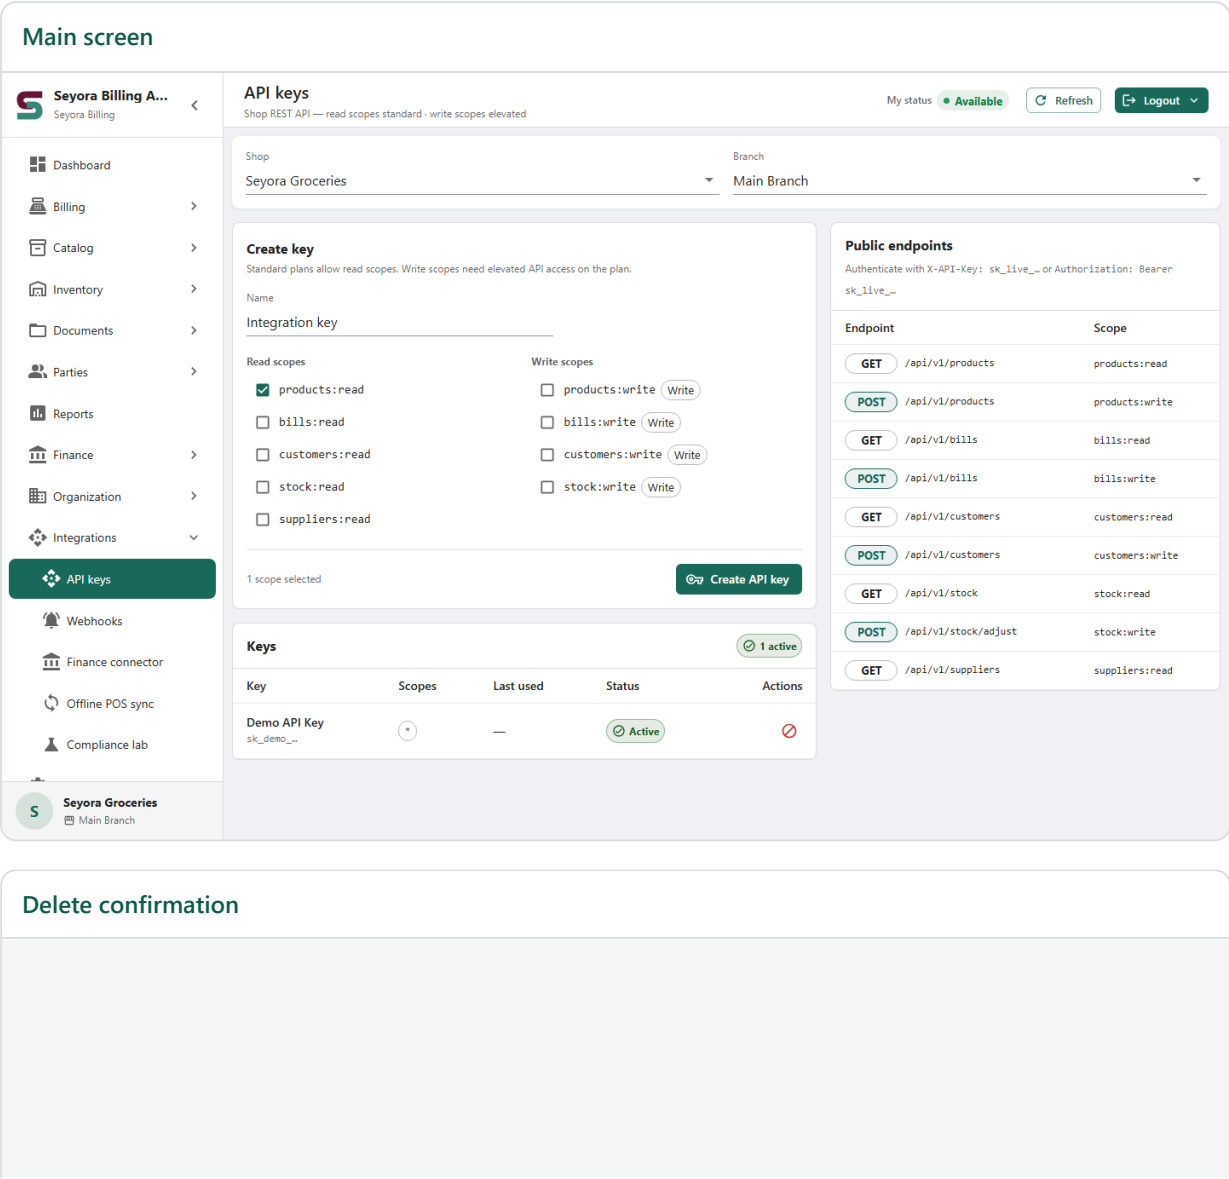

USER FLOW

- 1. Review scope catalog
- 2. Create named key with read/write scopes
- 3. Copy secret once; revoke keys

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

33. Webhooks

/settings/webhooks · 2 screenshots

PURPOSE

Push real-time event notifications to external HTTPS endpoints.

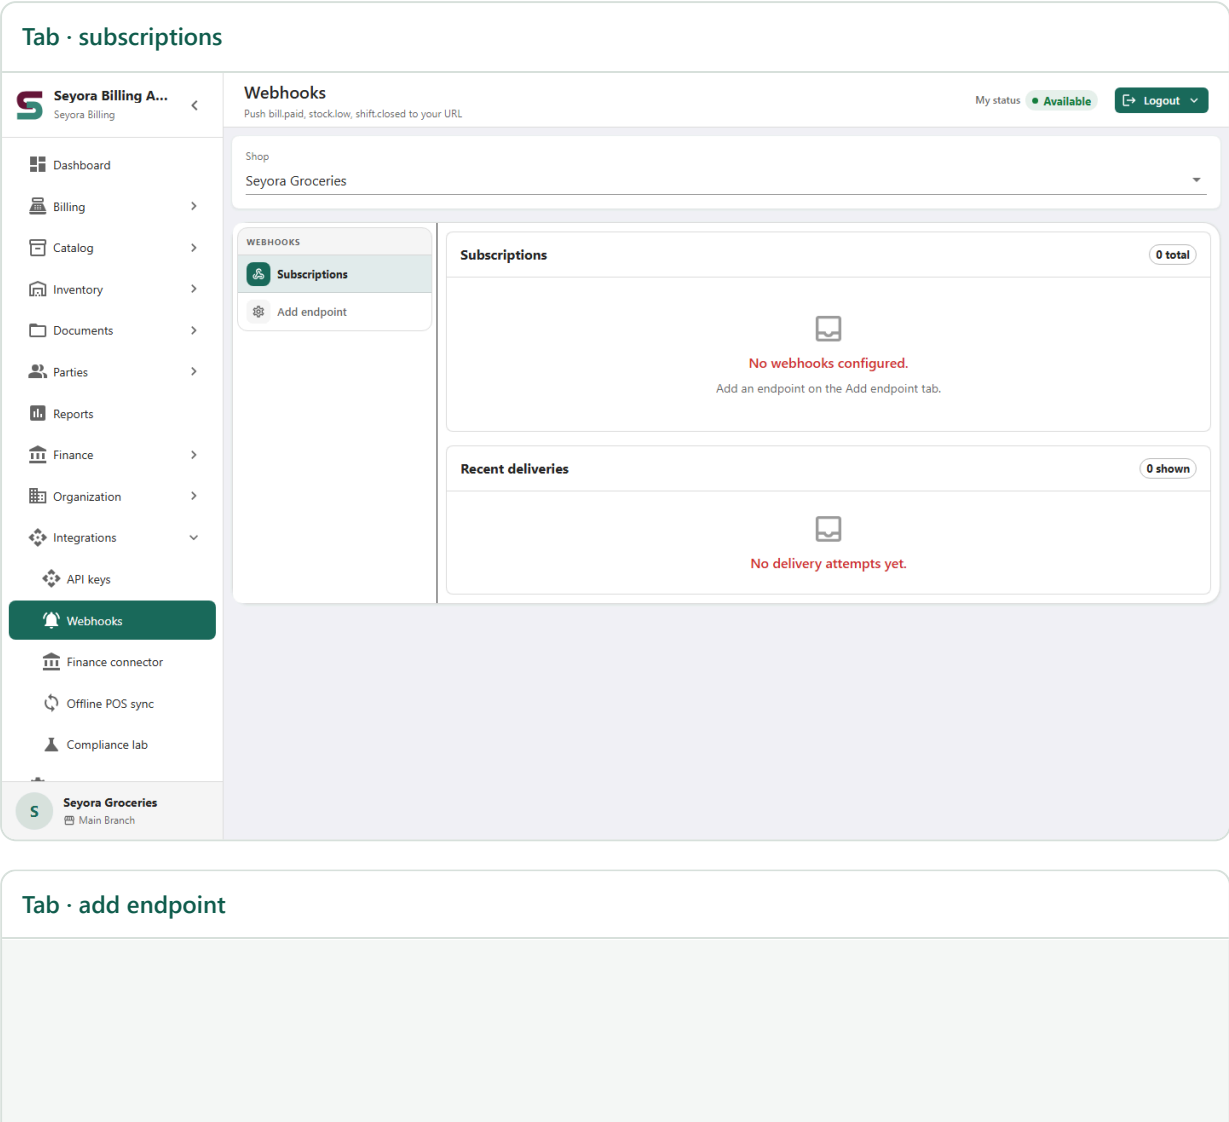

USER FLOW

- 1. SuperAdmin selects shop scope
- 2. View subscriptions and delivery log
- 3. Add endpoint URL and events
- 4. Copy signing secret; delete webhook

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

34. Finance connector

/settings/finance · 1 screenshot

PURPOSE

Export day books for TallyPrime, Zoho Books, or CA/FAS workflows.

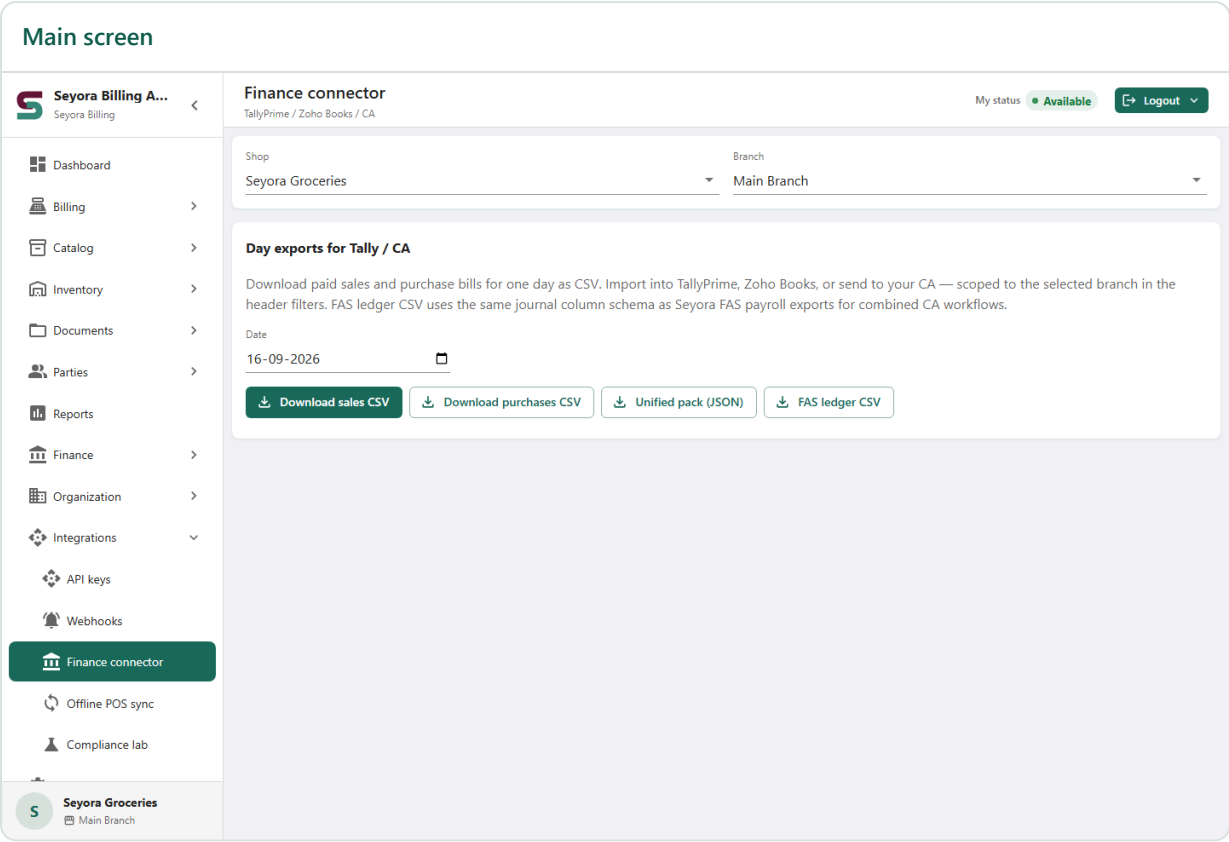

USER FLOW

1. Select shop/branch and export date
2. Download Tally sales or purchases CSV
3. Download unified JSON or FAS ledger CSV

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

35. Offline sync

/settings/offline-sync · 1 screenshot

PURPOSE

Monitor mobile offline POS catalog snapshot and server-side sync queue health.

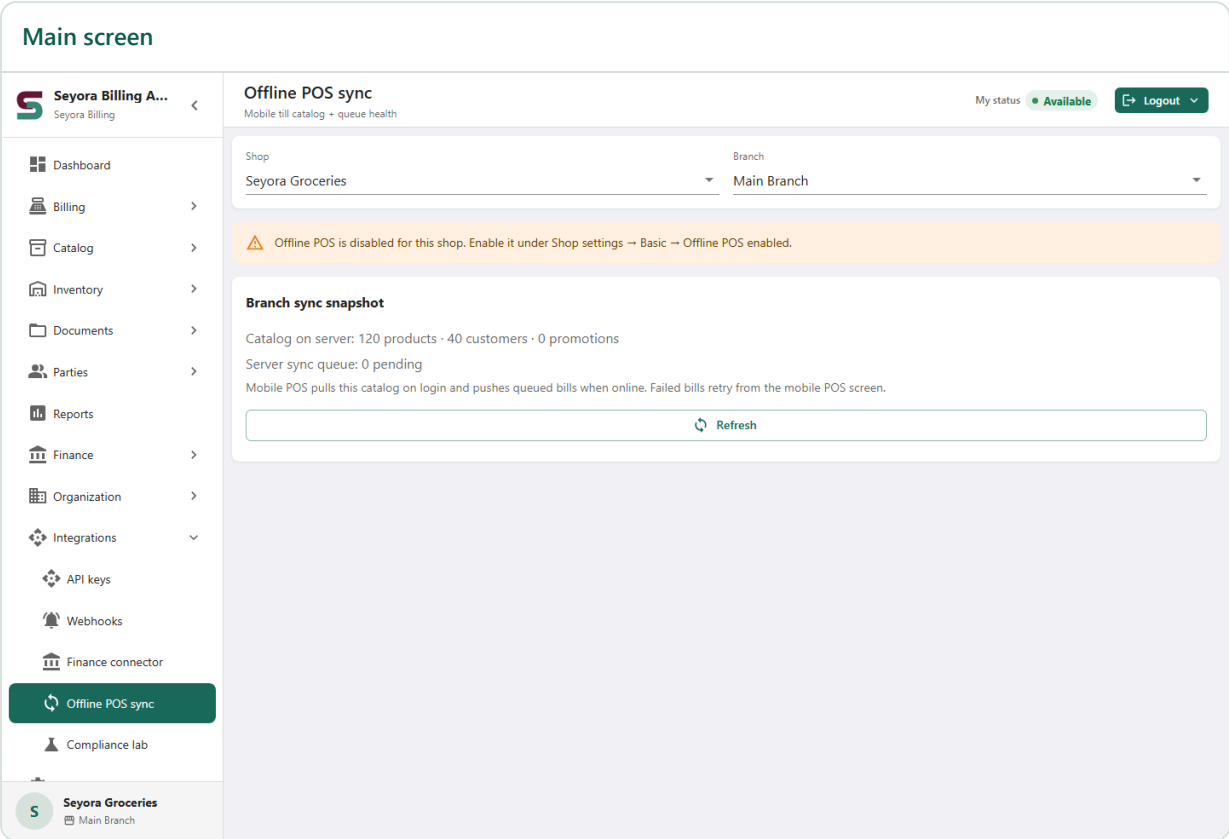

USER FLOW

1. Select shop and branch
2. View catalog counts and sync queue
3. Refresh status
4. Enable offline in Shop settings if disabled

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

36. Compliance lab

/settings/compliance · 1 screenshot

PURPOSE

SuperAdmin diagnostics for NIC e-invoice/e-way and SSO configuration.

USER FLOW

1. Review GST e-invoice provider flags
2. Ping NIC gateway
3. Run OIDC SSO discovery
4. Interpret go-live checklist alerts

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

Main screen

The screenshot displays the 'Compliance lab' screen within the Seyora Billing Admin interface. The left sidebar contains a navigation menu with options: Dashboard, Billing, Catalog, Inventory, Documents, Parties, Reports, Finance, Organization, Integrations, API keys, Webhooks, Finance connector, Offline POS sync, and Compliance lab (highlighted). The top header shows 'Seyora Billing Admin' and 'Seyora Groceries'. The main content area is titled 'Compliance lab' and includes a subtitle 'NIC e-invoice/e-way and SSO go-live checks'. It features a status bar with 'My status: Available' and a 'Logout' button. Below this, there are two main sections: 'NIC gateway (B6 / B7)' and 'SSO OIDC (B29)'. The 'NIC gateway' section includes a warning message about missing configuration and a 'Ping NIC gateway' button. The 'SSO OIDC' section includes a description of the discovery process and a 'Test OIDC discovery' button. The bottom of the screen shows a user profile for 'Seyora Groceries' with the role 'Main Branch'.

Seyora Billing Admin < **Compliance lab** My status: Available Logout

NIC e-invoice/e-way and SSO go-live checks

Shop: Seyora Groceries Branch: Main Branch

Provider stub: missing: NIC_API_URL, NIC_CLIENT_ID, NIC_CLIENT_SECRET, NIC_GSTIN, NIC_API_URL is not set. local mock: /api/v1/compliance/nic-mock. SSO not configured

NIC gateway (B6 / B7)

Ping your GSP URL or use the built-in mock when DEBUG=true: set EINVOICE_PROVIDER=live and NIC_API_URL=http://localhost:8001/api/v1/compliance/nic-mock, then generate IRN on a paid bill.

Ping NIC gateway

SSO OIDC (B29)

Validates the IdP discovery document using SSO_OIDC_ISSUER. Users sign in from the login page when SSO is enabled.

Test OIDC discovery

Seyora Groceries Main Branch

37. My account

/settings/profile · 1 screenshot

PURPOSE

Signed-in user profile, MFA, and session security controls.

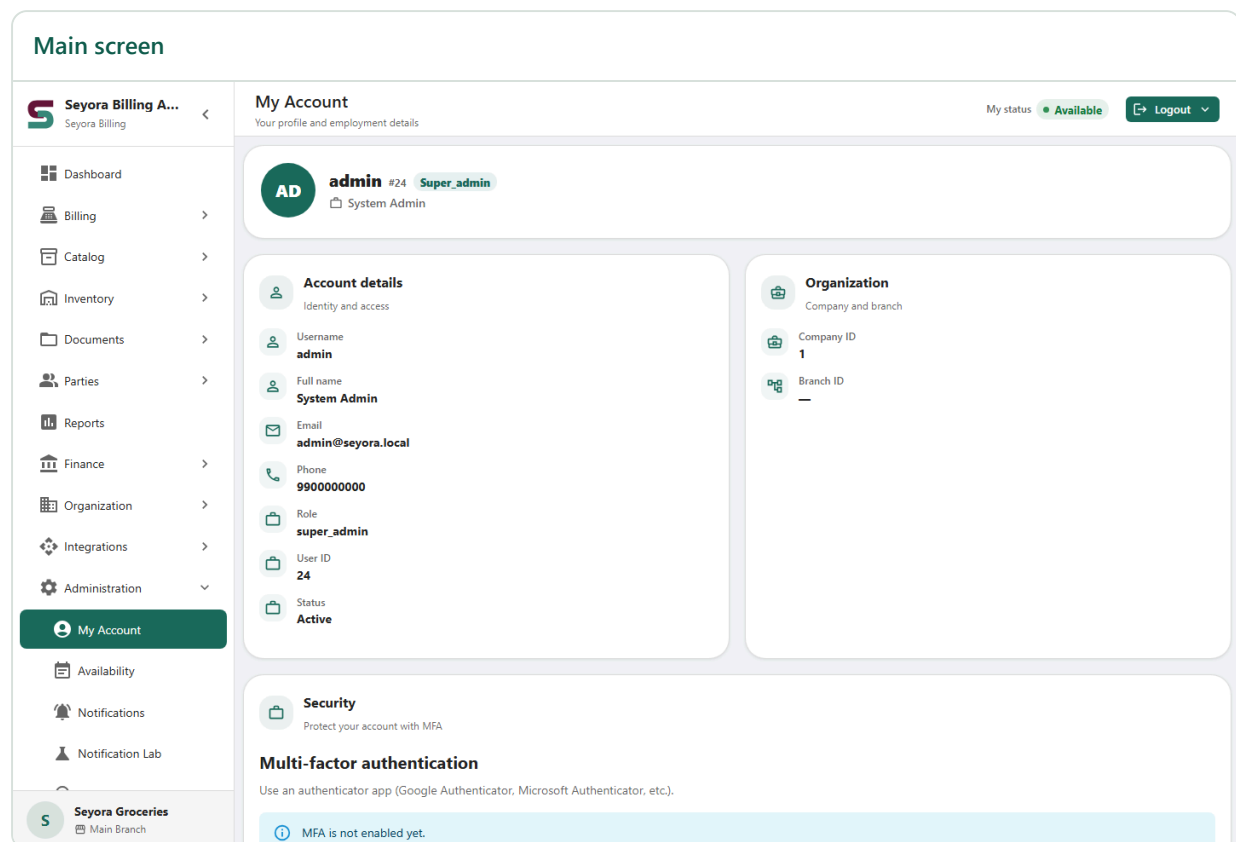

USER FLOW

1. View profile from session (GET /me via AuthProvider)
2. Enable/disable MFA
3. Revoke all other sessions

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

38. Availability

/settings/availability · 1 screenshot

PURPOSE

Set till-side staff availability status stored locally for counter display.

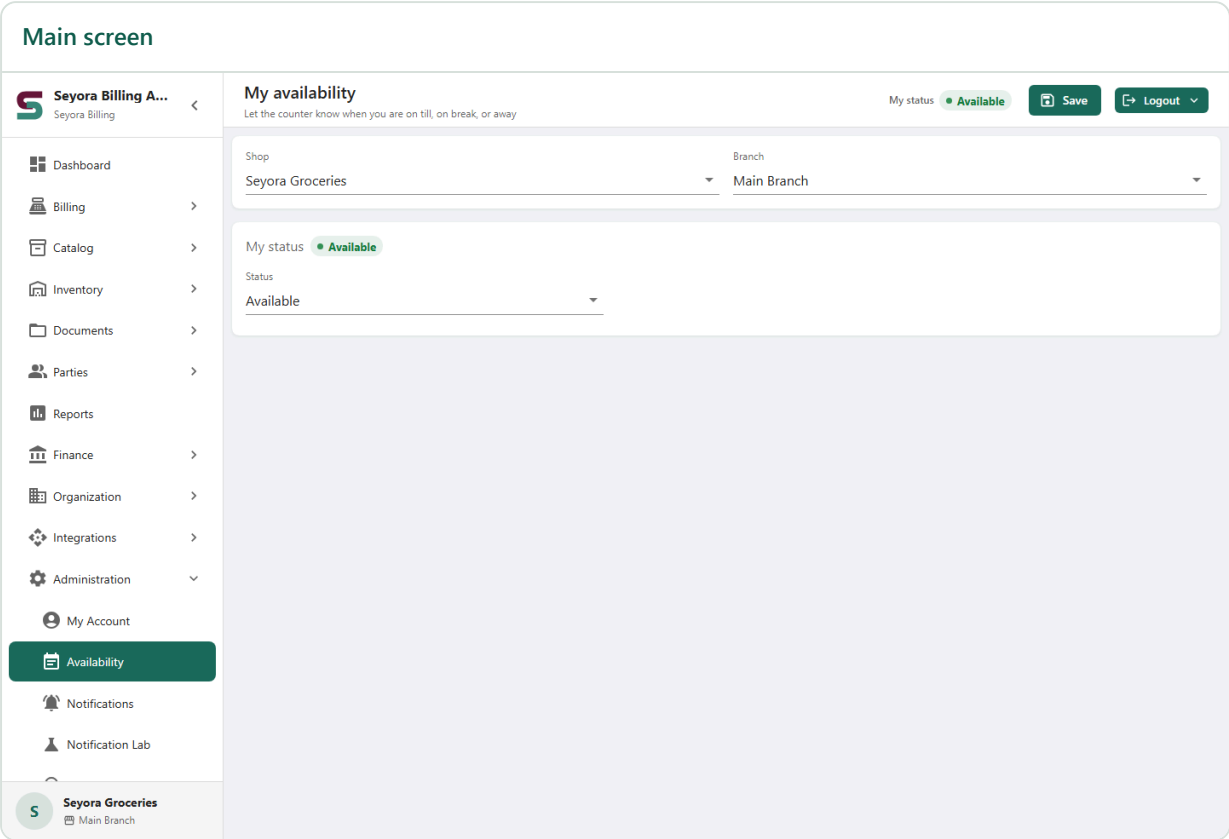

USER FLOW

1. Pick status: Available, On break, Busy, Away
2. Save to browser localStorage
3. Counter UI reads shared availability event

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

39. Notifications

/settings/notifications · 3 screenshots

PURPOSE

Configure shop notification rules and who receives email/SMS alerts.

USER FLOW

- 1. List notification rules
- 2. Create rule: event, channel, template
- 3. Attach staff recipients; toggle active

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

40. Notification lab

/settings/notification-lab · 1 screenshot

PURPOSE

SuperAdmin sandbox to inspect captured notifications without sending live email/SMS.

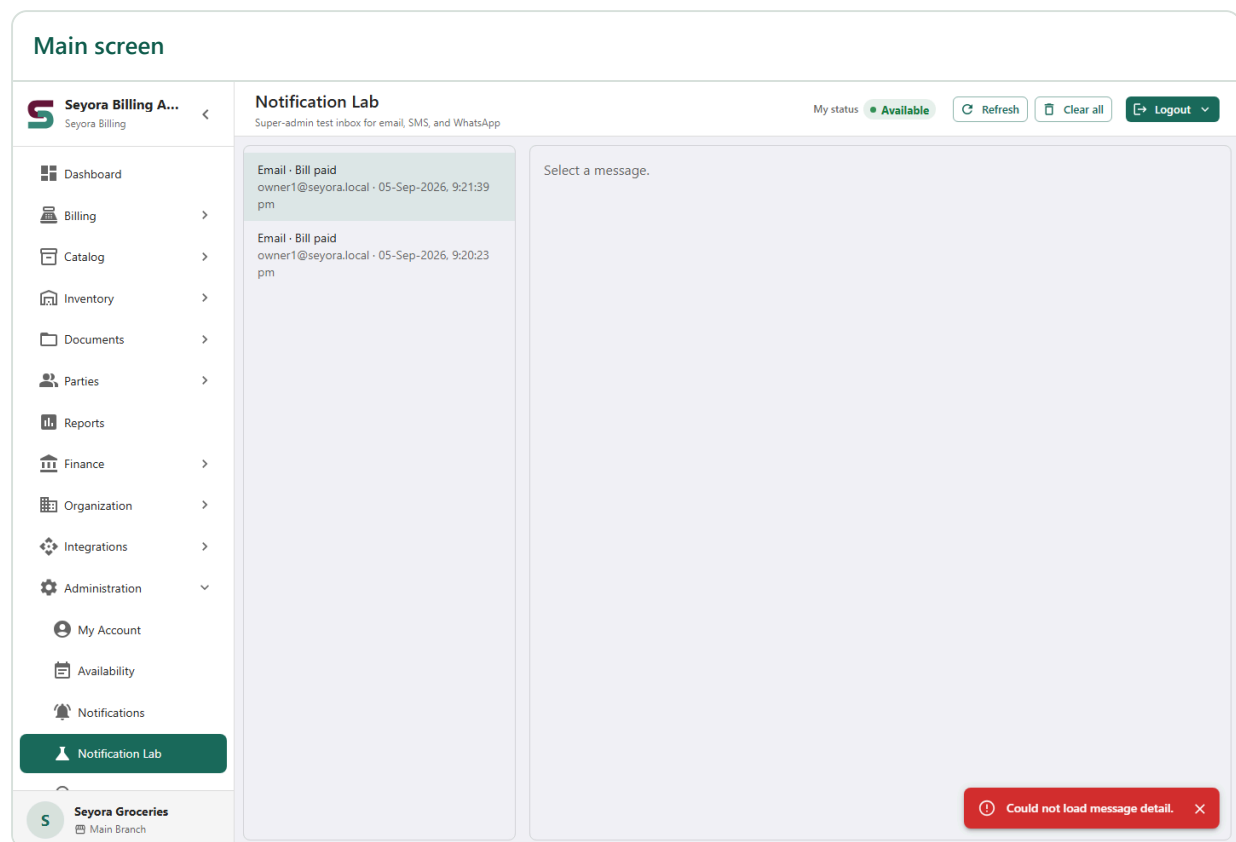

USER FLOW

1. Review lab status flags
2. Browse captured outbound messages
3. Inspect body/links; clear captures

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

41. SaaS plans

/settings/plans · 2 screenshots

PURPOSE

SuperAdmin SaaS plan catalog, entitlements, and subscriber overview.

USER FLOW

1. Browse Plans, Subscribers, Activity tabs
2. Create plan; edit entitlements
3. Set default plan; review subscribers

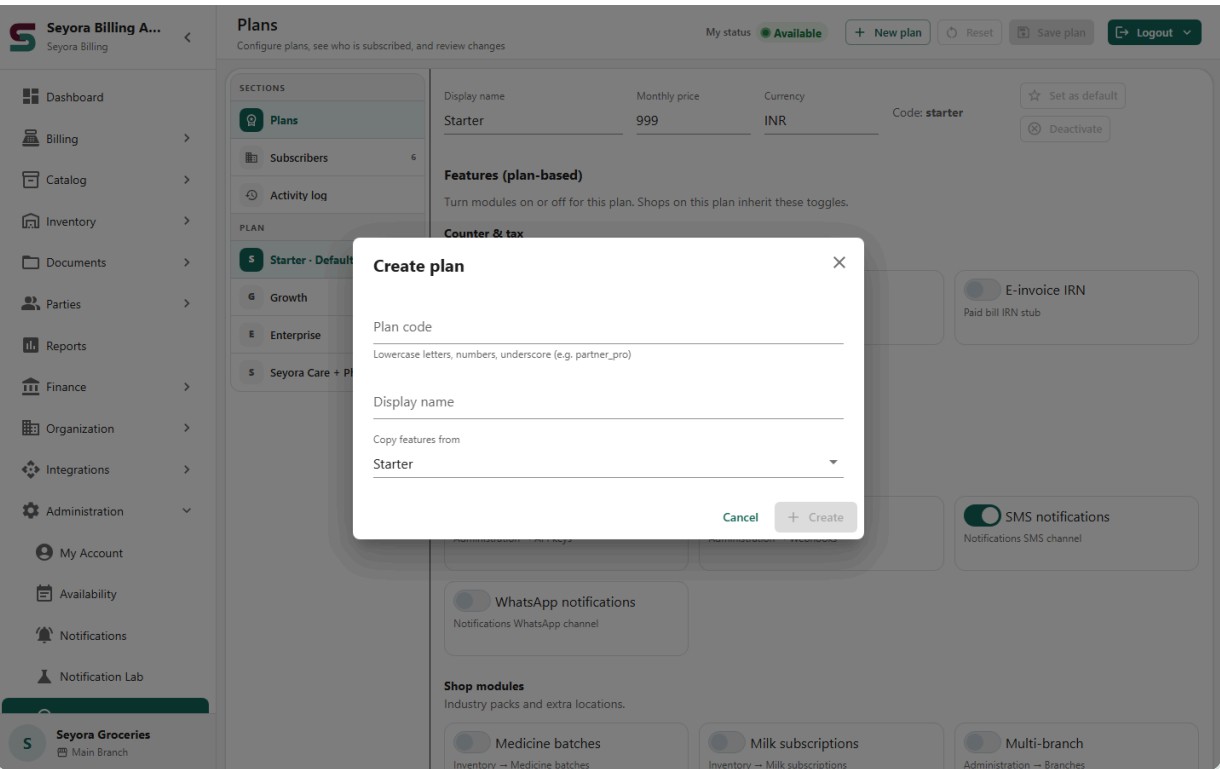

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS
