AUTH

1. Login

/login · 1 screenshot

PURPOSE

Sign in with user code and password to open the Seyora Clinic admin dashboard.

USER FLOW

1. Open /login.
2. Enter user code and password.
3. Optionally enter MFA code if enabled.
4. Click Sign In to enter the app.

FEATURES

- User code + password auth
- Optional MFA
- Theme toggle
- Forgot password guidance

32. Patient booking

/settings/patient-booking · 1 screenshot

PURPOSE

Patient booking screen for Seyora Healthcare — scoped by clinic and site where applicable.

USER FLOW

1. User opens ****/settings/patient-booking**** from the sidebar.
2. Page loads data for the selected clinic/site scope.
3. User performs the primary workflow on this screen.
4. Changes persist via the cloud API and refresh the list or detail view.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

Main screen

The screenshot displays the 'Patient booking' screen within the 'Seyora Clinic Admin' interface. The sidebar on the left contains navigation links: Dashboard, Front desk, Clinical, Inpatient, Billing, Reports, Organization, Integrations, ABDM / ABHA, Pharmacy link, Seyora One link, Patient booking (highlighted), Teleconsult video, Face devices, API keys, and Webhooks. The top header shows the user's status as 'Available' and a 'Logout' button. The main content area is titled 'Patient booking' and includes a subtitle 'Public book link and WhatsApp inbound for the selected clinic site'. It features dropdown menus for 'Clinic' (set to 'Demo - Test') and 'Clinic site' (set to 'Main OPD'). A section titled 'Patient booking' for 'Demo - Test - Main OPD' contains a light blue box with a share link icon and text: 'Share this link on WhatsApp / Google Business. Patients pick date, doctor, time, and in-person or teleconsult — no login required.' Below this, the 'Public book URL' is shown as 'http://localhost:5175/book/id-4/DEMO-HQ' with buttons for 'Copy link', 'Copy WhatsApp text', and 'Open'. The 'WhatsApp inbound webhook (Twilio)' section displays a POST endpoint: 'POST /api/v1/public/whatsapp/inbound?clinic_slug=id-4&site_slug=DEMO-HQ' and a note: 'Point Twilio Messaging webhook here. Patients can also text BOOK <Full Name> when clinic/site are in the query string.'

33. Teleconsult video

/settings/teleconsult-video · 1 screenshot

PURPOSE

Teleconsult video screen for Seyora Healthcare — scoped by clinic and site where applicable.

USER FLOW

1. User opens `**/settings/teleconsult-video**` from the sidebar.
2. Page loads data for the selected clinic/site scope.
3. User performs the primary workflow on this screen.
4. Changes persist via the cloud API and refresh the list or detail view.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

Main screen

The screenshot shows the 'Teleconsult video' settings page. On the left is a sidebar with navigation items: Dashboard, Front desk, Clinical, Inpatient, Billing, Reports, Organization, Integrations, ABDM / ABHA, Pharmacy link, Seyora One link, Patient booking, Teleconsult video (highlighted), Face devices, API keys, and Webhooks. The main content area has a header with 'Seyora Clinic Admin' and 'Seyora Clinic' on the left, and 'My status: Available' and 'Logout' on the right. Below the header, there are dropdowns for 'Clinic: Demo - Test' and 'Clinic site: Main OPD'. The main content area is titled 'Teleconsult video' with a status 'Active: daily'. It shows a green bar indicating 'Daily.co ready - seyora.daily.co.' and a note about 'Daily.co rooms via API (no Jitsi Log-in). Free tier ~10k participant-minutes/month. See docs/architecture/DAILY_SETUP.md.' Below this, there is a section for 'Implemented providers' with buttons for 'daily', 'external', and 'jitsi'. A note at the bottom says 'Doctor desk Join video and public /teleconsult/{token} use this provider. See docs/architecture/DAILY_SETUP.md.'

34. Face devices

1. User opens ****/settings/profile**** from the sidebar.
2. Page loads data for the selected clinic/site scope.
3. User performs the primary workflow on this screen.
4. Changes persist via the cloud API and refresh the list or detail view.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

Main screen

The screenshot displays the 'My Account' page within the Seyora Clinic Admin application. The interface includes a sidebar on the left with navigation options like Dashboard, Front desk, Clinical, Inpatient, Billing, Reports, Organization, Integrations, and Administration. The 'My Account' option is highlighted. The main content area is titled 'My Account' and shows the user's profile as 'Clinic Admin' (Super admin) with an 'Active' status. It is divided into two columns: 'Work information' (contact and organization details) and 'Role information' (access and assignment details). The 'Work information' section lists fields like Full name, Email address, Username, Clinic site, and Clinic. The 'Role information' section lists Dashboard role, My status, and Two-factor auth. At the bottom, there is a 'Multi-factor authentication' section with a message 'MFA is not enabled yet.' and a 'Start MFA setup' button.

45. Data retention

/settings/retention · 1 screenshot

PURPOSE

Data retention screen for Seyora Healthcare — scoped by clinic and site where applicable.

USER FLOW

1. User opens ****/settings/retention**** from the sidebar.
2. Page loads data for the selected clinic/site scope.
3. User performs the primary workflow on this screen.
4. Changes persist via the cloud API and refresh the list or detail view.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.

SCREENS

Main screen

The screenshot displays the 'Data retention' configuration page within the Seyora Clinic Administration interface. The sidebar on the left lists various administrative functions, with 'Administration' currently selected. The top header shows the user's status as 'Available' and provides 'Save' and 'Logout' options. The main content area is titled 'Data retention' and includes a subtitle 'How long patient health records are retained for this clinic'. It features two dropdown menus for selecting the 'Clinic' (set to 'Demo · Test') and 'Clinic site' (set to 'Main OPD'). Below these, a text box explains the default retention period: 'Clinic: Demo · Test · Default 2555 days (~7 years) aligns with common Indian clinical record practice. Purge jobs are not automated yet — this setting is the policy source of truth.' A section labeled 'PHI retention (days)' shows a value of '2555' with a range of '30 - 3650' indicated below it.

46. Audit log

/settings/audit · 2 screenshots

PURPOSE

Audit log screen for Seyora Healthcare — scoped by clinic and site where applicable.

USER FLOW

1. User opens ****/settings/audit**** from the sidebar.
2. Page loads data for the selected clinic/site scope.
3. User performs the primary workflow on this screen.
4. Changes persist via the cloud API and refresh the list or detail view.

FEATURES

- Tabs / section rails switch in-page views when a page has more than one.
- Drawers and dialogs handle detail, create, edit, and delete flows.
- Role and plan entitlements control what this user can change.
